## DETAILED ACTION

### ***Information Disclosure Statement***

1. The information disclosure statement filed May 30, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Applicants should note that the examiner did consider and cite on the 892, the US equivalents of each of the WO references listed on the IDS.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, the term "using" is indefinite. A "process" defined in the sole terms of "use of" does not define patentable subject matter under 35 USC 101. See *In re Fong*, 129 U.S.P.Q. 264 (CCPA 1961). The examiner suggests the incorporation of defined method steps into this claim to overcome this rejection.

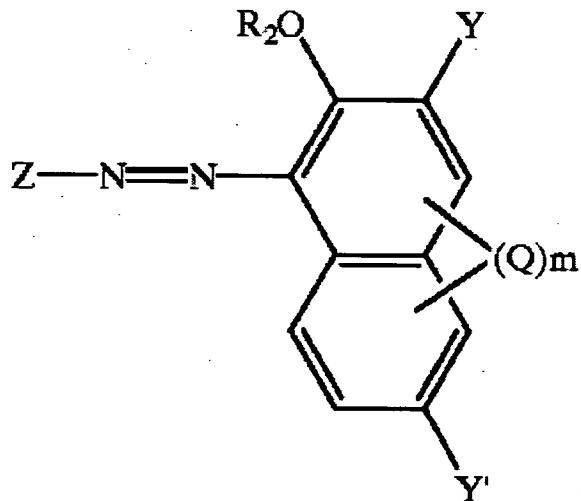

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueno et al. (US 5,973,126) in view of Ueno et al. (US 6,409,812).

Ueno et al. teach a monoazo compound of the formula

wherein Y represents  $-(CONH)_n-X$ ; Y' represents  $-(CONH)_n-X'$ ; X and X' independently represent an optionally substituted aromatic group or an optionally substituted heterocyclic group having a conjugated double bond; n is the integer 1; R<sub>2</sub> is H; m is 0 and Z represents an optionally substituted monovalent aromatic group. The azo compound can be used as a pigment in printing inks, paint and/or plastics. See col. 1,

line 47 – col. 2, line 21, col. 5, lines 15-17, examples 1-22, 25-28, 77 and 78 and claims 1-5. Ueno et al. fails to specifically disclose the ingredients of the ink composition (i.e. resin and solvent) as claimed by applicants.

Ueno et al. teach a similar monoazo compound that is useful as a pigment in printing inks, paints and/or color filters. The printing ink for color filters comprises the monoazo pigment, a resin such as an acrylic resin or an epoxy resin, a solvent and optionally a dispersing agent such as a surfactant wherein the monoazo pigment is present in an amount of 10-50 parts by weight per 100 parts by weight of the resin. See col. 1, line 35 – col. 2, line 20, col. 5, lines 28-65, col. 6, lines 53-58, col. 7, lines 20-44, col. 9, line 49 – col. 10, line 41 and claims 1-6, 12 and 14.

Therefore, it would have been obvious to one having ordinary skill in the art to have used the monoazo pigments of Ueno et al. ('126) as the monoazo pigments of Ueno et al. ('812) because the substitution of art recognized equivalents as shown by Ueno et al. ('812) would have been within the level of ordinary skill in the art.

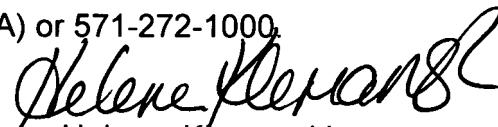

### ***Conclusion***
